

# RELIEF FOR POINT-2-POINT (P2P) OPERATORS

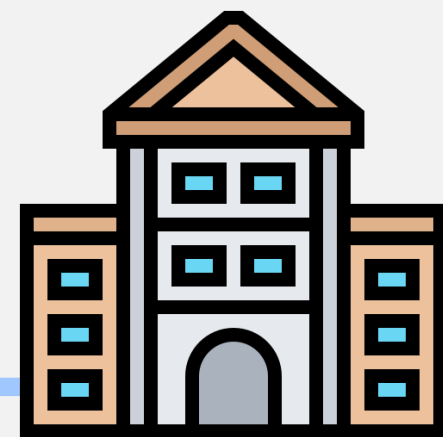

## Point-to-Point Support Package 2 (PPSP2)

### Brief Description

- The Land Transport Authority (LTA) has enhanced and extended the PPSP to become the PPSP2 where funds will be provided from **May to September 2020**.
  - The additional waivers will help P2P **operators** to tide through the current difficult business climate
    - The P2P sector is one where taxis and private hire cars (PHCs) are used to provide transportation services to commuters
- To help **taxi operators** cover the cost of their unhired taxis, the Government will also provide up to \$2,200 in special relief for each unhired taxi (taxi drivers may stop renting taxis during this period due to lack of demand for taxi services).
  - All operators are strongly encouraged to pass on these business cost savings to their drivers, such as through rental reductions and waiver of early return contract breakage costs.

## Eligibility & Criteria

- For taxi and private hire car (PHC) operators
- Financial help would be provided to operators by the government and these business cost savings would be passed on to drivers through the operators.
- For more information about financial help for drivers, do contact your respective operators.
